REFERENCE LETTER

I am pleased to strongly recommend JUWAL as a reliable and high quality supplier of machinery for sawmills. The debarker we purchased has proven to be a solid, dependable machine that clearly enhances the efficiency and consistency of our operations.

From the very first interaction, JUWAL acted as a partner rather than a vendor. Their guidance was accurate and practical, based on a clear understanding of our needs. Communication has been fast, transparent, and effortless—despite operating across different countries. There has never been a language barrier, and technical support has always been available and helpful.

The debarker has operated just as advertised—stable, efficient, and highly dependable. After integrating it into our workflow, we observed a substantial drop in blade consumption and a faster overall processing cycle.

The improvement is equally visible in the final product. Debarked logs are cleaner, more uniform, and better prepared for subsequent processing, which elevates the overall quality and value of the finished materials.

For any sawmill seeking machinery that genuinely enhances production processes — and a partner who stands behind their product from start to finish — JUWAL is a choice I can recommend without hesitation.
